Jaime Navarrete Hidalgo -Influenza vaccination effectiveness in preventing hospitalization of adults with high-risk conditions. A multicentre case-control study. Diana Toledo -Effect of an intensive intervention based on a reduced-energy mediterranean diet on alcohol consumption and beverage type in adults with metabolic syndrome: results a 2 year follow-up. María Rubín García -Evidence synthesis for guideline development: identifying and synthesising evidence on aspirin and non-aspirin NSAIDs for colorectal cancer prevention within the ECICC initiative. Elena Stallings
17:00 – 17:30 h	Descanso
17:30-18:00 h	Mi investigación en 5 min – parte 2 -Gut microbiome and response to anti-GD2 immunotherapy in pediatric neuroblastoma patients: A longitudinal pilot study. Aleix Lluansí -Molecular and serological epidemiology of Enterovirus A71 after the 2016 outbreak in Spain. María Cabrerizo -Ultra-processed Food Consumption and Sleep Quality among First-year Spanish University Students: The uniHcos Project. Tania Fernández Villa -Genomic Surveillance Strategy for Tuberculosis in Catalonia: TB-SEQ. Antoni Escalas Bordoy -Use of a seroneutralisation assay as complementary diagnosis tool in

	suspected measles secondary vaccine failure cases. Aurora Fernandez García -A gated nanosensor for selective detection of Dengue virus RNA in mosquito samples. Álvaro Chiner Oms -Development, Validation, and Reproducibility of a Food Frequency Questionnaire for Assessing Plant-Based and Omnivorous Dietary Patterns in the OMIVECA study. Esther Molina Montes -Nutrigenetic perspective of one-carbon metabolism on breast cancer risk within the EPIC cohort. José María Gálvez Navas
18:00-19:00 h	Acción estratégica Desigualdades sociales en la salud Maribel Pasarín y Helena González
19:00 h	Fin primer día
Viernes, 6 de noviembre de 2026	
8:30 – 9:30 h	Reunión interna CD CIBERESP
09:30 - 10:30 h	Proyectos intramurales 2024 - Health technology assessment in AI: Automatic Telemonitoring in Heart Failure. Ignacio Ferreira y Maria Rubio - Factors associated with the adherence to the Mediterranean diet and ultra-processed foods consumption and their influence on obesity and blood pressure during childhood (4 to 11 years). Sandra González - Allostatic load, environmental factors, and colorectal cancer in the European Prospective Investigation into Cancer and Nutrition (EPIC)-Spain cohort. Dafina Petrova y Camino Trabajo - Use of cardiac biomarkers in perioperative risk evaluation of adult patients submitted to major non-cardiac surgery procedures. Gerard Urrutia y Borja M. Fernández
10:30 - 11:10 h	Proyectos estratégicos CIBERESP - Genoma de la Cohorte IMPaCT (Go-IMPACT). IP: Pablo Fernández e Ivo Gut. Presenta: Pablo Fernández - Enriquecimiento de la cohorte IMPaCT con medidas AMBIentales y de Salud Ocular para la medicina preventiva de preciSION (AMBISiON-IMPACT). IP: Esther García y M^a José Sánchez. Presenta: Esther García - Incorporación de la información clínica de atención primaria y hospitalaria en la cohorte IMPACT (IMPACTIC). IPs Fernando Rodríguez y Óscar Zurriaga. Presenta: Óscar Zurriaga
11:10 h- 11:20 h	Descanso
11:20 - 12:20 h	Sesión áreas invitadas - José María Millán Salvador. Director científico CIBERER - Adolfo López de Munain Arregui. Director científico CIBERNED
12:20 - 12:50 h	Descanso
12:50 - 13:30 h	Gerencia + Transferencia Margarita Blázquez Luzma García/Juan Luque
13:30 – 14:15 h	Asamblea/Clausura
14:15 h	Fin
