

Invitation to Apply to Merck's 2016 European Emerging Biotech Grant Program

We would like to inform you and your company about a Grant we are running in Europe this year for Emerging Biotech (EB) companies like yours, and kindly invite you to apply for a chance to win up to €100,000 in products and services to help bring your molecule's development journey to the next step. [Apply here!](#)

Merck's Life Science Process Solutions team is supporting European start-up and medium-sized Biotech companies to achieve their potential in bringing the next generation of therapeutics to market, and to back this up we are launching our [3rd Emerging Biotech Grant Program](#), this year in Europe. This follows previous programs in China and the US, where some of our grant winners have gone on to raise significant additional VC funding to advance their therapeutic candidate to the next phase.

We have a keen interest in supporting your in-house bioprocess development with our extensive Life Science [consumables and instrumentation](#), including single-use systems, chromatography, filtration, media, cell lines. Additionally, we have a host of outsourcing services where we can support you from Discovery right through to Commercial, via our [Provantage](#) biodevelopment CDMO, [bulk viral and gene therapy](#) CMO, [Antibody-Drug Conjugate](#) CMO, and [Bioreliance](#) biosafety testing services...

To this end, we will be visiting your area in the coming months to meet potential grant applicants for initial discussions. The grant is live, so please feel free to send in an application in advance, it should take no more than 10-15mins. [Apply here!](#) Please do let me know if you or colleagues would be interested in a short initial discussion, and we can schedule an appointment...

Best wishes,

The Merck logo in a teal color.
